

THEORY OF COMPUTATION

Name : Yuvann Nithish R

Register No: 192411267

Course Code : CSA1304

Lab Experiment (31-40)

Design PDA using simulator to accept the input string anbn

Design TM using simulator to perform string comparison where $w=\{aba\ aba\}$

Design DFA using simulator to accept the string having 'abc' as substring over the set $\{a,b,c\}$

31. Design DFA using simulator to accept even number of c's over the set {a,b,c}

Design DFA using simulator to accept strings in which a's always appear tripled over input {a,b}

Design NFA using simulator to accept the string the start with a and end with b over set {a,b} and check W= abaab is accepted or not.

Design NFA using simulator to accept the string that start and end with different symbols over the input {a,b}.

Design NFA using simulator to accept the input string "bbc", "c", and "bcaaa".

Design DFA using simulator to accept the string the end with abc over set {a,b,c} W= abbaababc

Design NFA to accept any number of b's where input={a,b}.
